---

Product Designer with 1+ years of experience in UI/UX design, user research, and usability testing. Designs mobile-first, offline-capable products for low-bandwidth and low-end-device users in Nigeria, including Mombee, a maternal health and immunization-tracking app. Skilled in Figma, wireframing, prototyping, design systems, and cross-functional collaboration with product managers and developers. Previously contributed to a 10% increase in product conversion rate at Gilah Global Limited.

SKILLS

Design: UI Design, UX Design, Wireframing, Prototyping, Information Architecture, Responsive Design, Mobile-First Design, Design Systems, Component Libraries, Visual Design
Research & Testing: User Research, Usability Testing, User Flows, Manual UI Testing, Design Reviews
Tools: Figma, Auto Layout, FigJam, Adobe Photoshop, Illustrator, Affinity
Development Familiarity: HTML, CSS, JavaScript, TypeScript, Next.js

EXPERIENCE

Mombee, Maternal Health & Immunization Tracking App (Independent Project, In Development) | Product Designer Aug 2026 – Present

- Analyzed Nigeria's National Programme on Immunization (NPI) schedule and local maternal health barriers using AI-assisted research (Claude), translating findings into feature requirements for compliance and cultural relevance.
- Built a Figma component library with Auto Layout, using high-contrast styles for outdoor readability on low-end smartphone screens.
- Designed offline-first user flows that let mothers log health data, view prenatal tips, and track appointments without connectivity, with automatic sync on reconnection.
- Conducted 3 usability tests with 15 participants; simplified the onboarding flow after testers struggled to complete the onboarding.

Gilah Global Limited | Visual Designer & Manual UI Tester Mar 2022 – May 2023

- Designed visual assets and conducted targeted user research for a landing page, contributing to a 10% increase in conversion rate.
- Performed manual UI testing on web and mobile releases, verifying implementation against design specifications and reporting 30+ defects to developers using Jira.
- Partnered with product managers and designers in design reviews to keep features aligned with defined user journeys.

EDUCATION

National Open University of Nigeria | BSc, Mathematics and Computer Science Expected 2027

- Final-year project: Designed and implemented a passwordless authentication module and evaluated its impact on user experience and adoption compared with password-based login.

National Institute of Information Technology | Certification in Creative Publication 2018

- Applied design principles to brand identity, editorial and visual design projects.
